CARBONATION  
LIKE NEVER BEFORE!

SodaTap  
SYSTEMS

# A BETTER SYSTEM IN EVERY WAY.

SodaTap Systems combines state-of-the-art beer refrigeration technology with all-new soda dispensing technology to create **SodaTap Soda**. Sealed glycol chilling conduits refrigerate the product and deliver continuous pressure for a soft, laminar flow. The result is ideal for full- or self-service applications where patrons experience the “perfect pour.”

# MAKE SODA A FOCAL POINT.

## BROADEN YOUR BEVERAGE MENU:

- Traditional bag-in-box soda products as well as craft soda with pure cane sugar
- Serve any combination of carbonated and uncarbonated beverages
- No need to be married to Coke® or Pepsi® products

## TECHNOLOGY THAT CONSISTENTLY DELIVERS:

- The best quality carbonation and pour/taste experience
- An elegant counter-top dispenser station that can be customized for you
- Mastering rough and finished carbonation with brewed-in carbonation

## CHANGES YOU'VE BEEN WAITING FOR:

- No more big, fountain-style counter-top machines
- No more noisy electric valve dispenser action
- Turn-key installation and service through the SodaTap Systems Service Network
- No ice/water baths that take up valuable space
